Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hernandez et al, U.S. Patent No. 5,882,794 in view of Hernandez et al, U.S. Patent No. 5,683,811. Hernandez et al '794 discloses a filled article such as a comforter or quilt, (col. 1, lines 25-37), comprising a plurality of crimped fibers having a denier and length within the claimed range, (col. 3, lines 21-28) and a staple pad friction of less than 0.26, (table 5). Hernandez et al '794 differs from the claimed invention because it does not disclose blowing the fibers into the article so that they have a non-clustered configuration, but instead forms either fiber balls or batting to fill the articles. Hernandez et al '811 teaches that crimped polyester fibers having the same denier and length may be formed into fiberballs, into batting or may be opened and blown into pillows and other articles to fill them. See examples, especially example 4. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have blown the fibers of Hernandez et al '794 into pillows and other articles. One of ordinary skill in the art would have been motivated to have blown the fibers because of the teaching of Hernandez '811 that forming a batting, forming fiberballs and blowing the opened fibers into a pillow or other articles were all known and equivalent methods of filling such articles. With regard to claim 6, while neither reference discloses a staple pad friction of less 0.19 or less, it would have been obvious to one of ordinary skill in the art to have optimized the staple pad friction through the

process of routine experimentation in order to form a pillow, comforter or other article having the desired aesthetic properties.

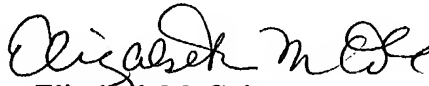

2. Applicant's arguments have been fully considered but are moot in view of the new grounds of rejection. Applicant's argument that Hernandez '794 does not disclose a blown fiber or an unclustered fiber as those terms are defined in the specification are persuasive and therefore the rejection under 102(b) is withdrawn.
